

CNC Turning Center

CNC Turning Center

GT

Ideal for Hard Material Machining

The GT Series includes a range of machines from 6" - 12" chucks, with rigid flat bed, 2-axis boxway construction and heavy-duty ballscrews, allowing high metal removal rates. Backed by a robust structure and high torque spindle, ensures machining stability in hard, or tough to machine materials.

TC

Ideal for General Machining (TC-16)

The TC-16 models are available with 6" & 8" chuck sizes, feature a 45° slant bed structure, linear guides, and are best suited for general purpose, high productivity, 2-axis machining.

Ideal for Heavy Duty Machining (TC-26, 36, 46, & 46M)

The TC-26 & 36 models are available with 10" & 12" chuck sizes and the TC-46/46M are available with 15" - 24" chuck sizes.

These heavy duty machines also feature a 45° slant bed design, robust box way construction, and powerful high torque geared-head spindle, making them ideal for heavy machining applications. With Z-axis travels from 700mm ~ 3,200mm [27.56" ~ 125.98"](#) these machines offer spacious working area to machine large-sized workpieces, such as valves, shafts and hydraulic components for the aerospace, automotive, power generation, shipbuilding, construction, and oil/gas industries.

To meet high customer expectations, YCM offers a comprehensive range of CNC turning centers with a variety of chuck sizes, bed lengths, and optional performance features & functions. Our strategically designed MEEHANITE® cast iron structures provide high rigidity for heavy cutting, precision tolerances and fine surface finishes. These products meet the demanding requirements for multiple industries such as automotive, medical and job shop.

NTC

Configurable Design for Complex Machining

NTC models are available with 8" chuck size, feature a 30° slant bed structure with robust boxway construction. The NTC's highly modular design allows customers to choose from a variety of machine configurations of turret, tailstock, sub spindle and Y-axis that best fits their application to complete the most complex jobs in a single setup.

NT

High Productivity Design, Heavy Duty Structure

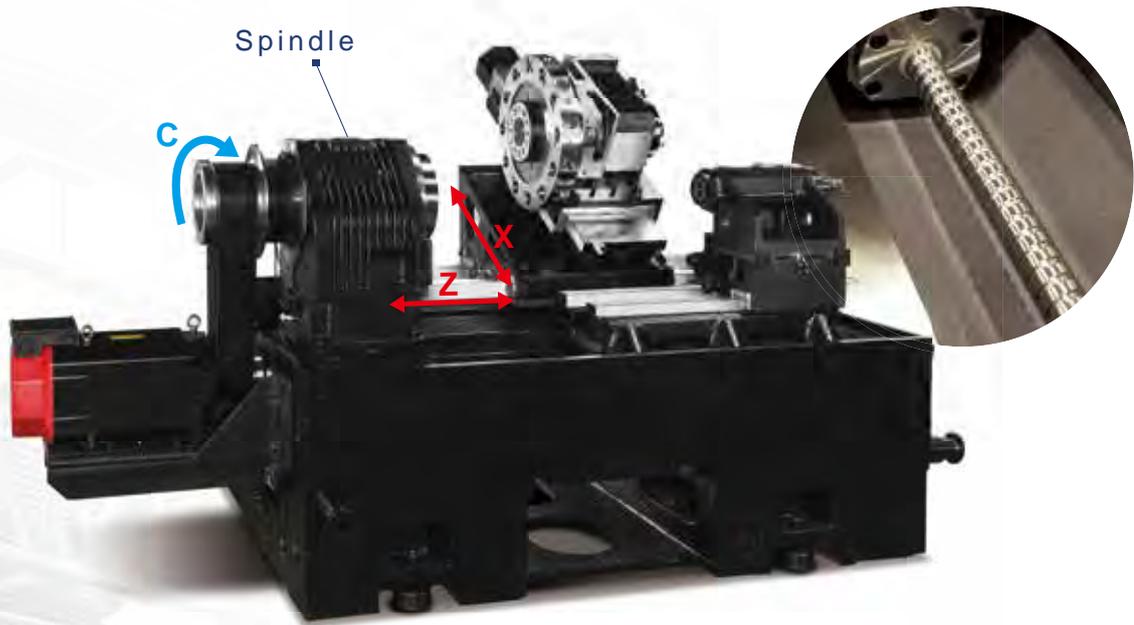

NT models are available with 10" chuck size, feature a robust 30° slant bed structure with boxway construction. With standard high productivity features like Y-axis, sub spindle, and C-axis, complex parts can be completed in a single setup maximizing production efficiency.

GT

Rigid Boxway
Turning Center

Strategically Designed Structure

The heavy-duty base design incorporates large boxways and all castings are made from high quality, durable MEEHANITE® cast-iron providing high rigidity and stability during heavy machining operations.

Model	Structure	Box Ways	Anti-distortion	Dampening Capacity
GT Series	Strengthened	Extra-large	Enhanced	Enhanced
Competitors	General	General	General	General

Thermally Stable Design

- Symmetrically designed headstock combined with effective spindle headstock exhaust fans provide superior ventilation throughout the spindle compartment, help to minimize thermal growth.
- The spindle motor is mounted to the left side of the machine base and is designed to exhaust the heat generated from spindle motor away from the machine structure.
- Isolated coolant tank minimizes the effect of coolant temperature fluctuation, reducing potential structural deformation.
- High-performance hydraulic piston pump provides high efficiency and low heat minimizing the thermal impact of hydraulic system.

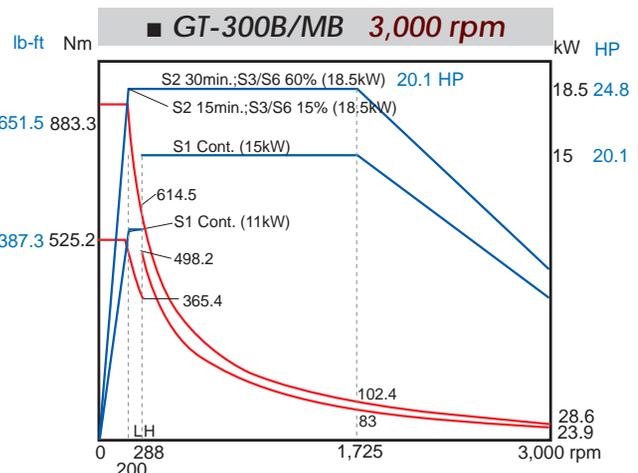

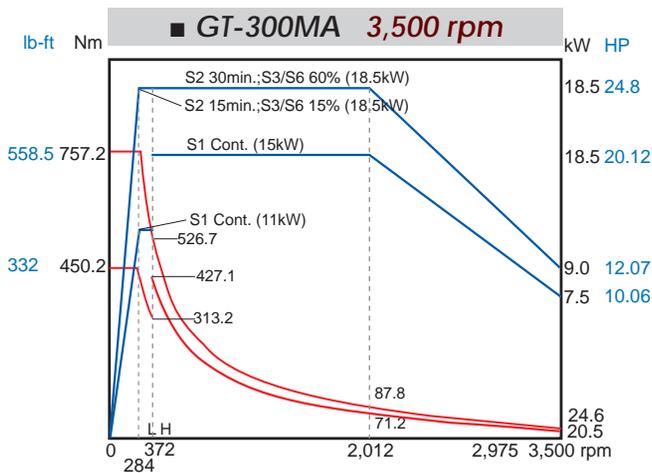

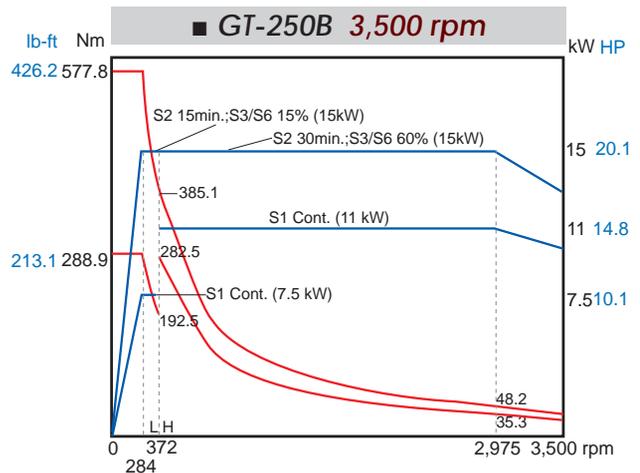

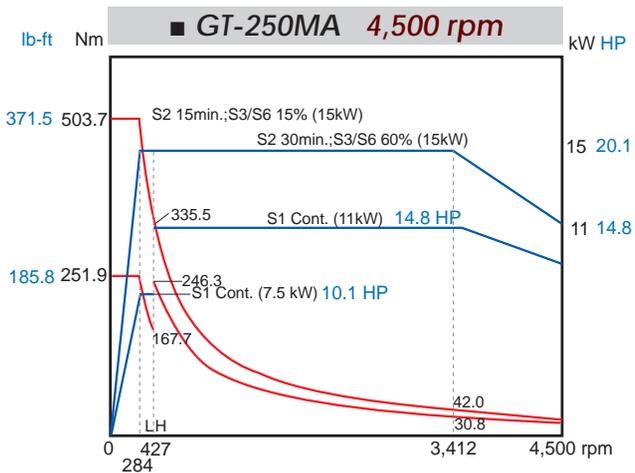

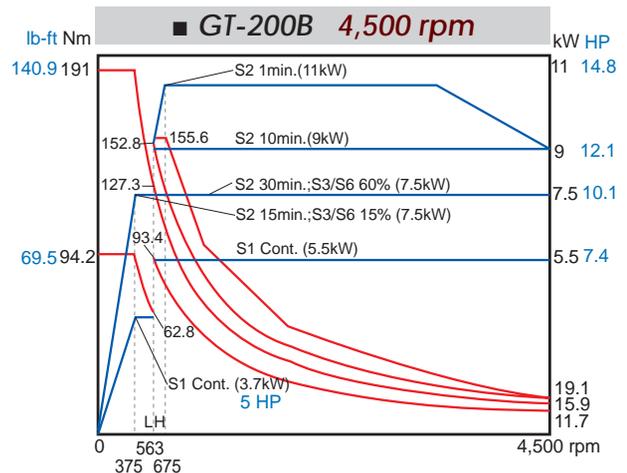

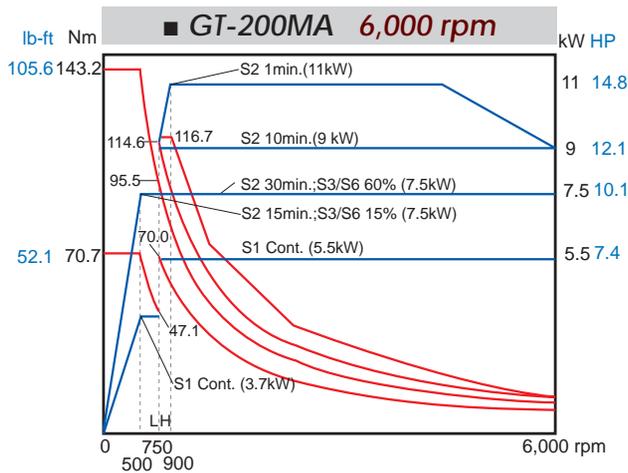

High Performance Spindle

- YCM cartridge-type spindles are designed utilizing robust dual-roller bearings that provide high stiffness, rigidity and durability.
- Built to high quality standards in our spindle head room, these spindles provide high performance machining capability and long service life.

VDI Live Tool Motor Torque Chart

Power Torque

TC

Broad Range of
2-Axis Turning Centers

TC-16LA / LB

Stable Base Structure

- One-piece 45° slant bed base is made of high quality MEEHANITE® cast iron that provides high stiffness and damping characteristics.
- This series offers the largest machining capacity in its class, with a max. turning diameter of $\varnothing 260$ mm $\varnothing 10.24$ " and a max. turning length of 600 mm 23.62 "

Fast, Reliable Turret

- Servo-driven turret with hydraulic clamping enables a faster tool change time.
- Large curvic coupling provides high stiffness, accurate positioning and repeatability accuracy.

Large Bar Capacity

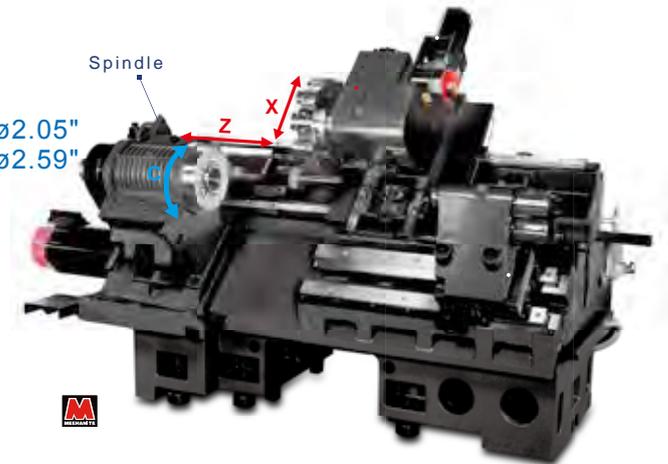

- 6" chuck with hole through draw tube of $\varnothing 52$ mm $\varnothing 2.05$ "
- 8" chuck with hole through draw tube of $\varnothing 66$ mm $\varnothing 2.59$ "

Hydraulic System

- High efficiency plunger type hydraulic pump minimizes power loss and heat generation.

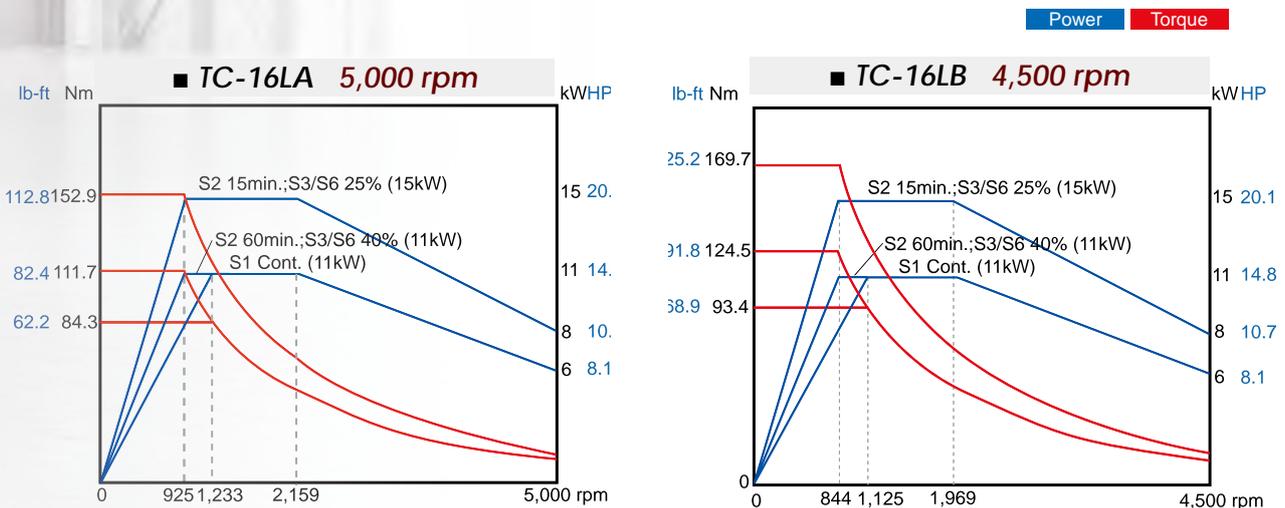

High Performance Spindle

- YCM spindle features large diameter roller-type bearings and angular contact ball bearings, providing the best radial and axial rigidity during heavy machining.
- All YCM spindles are assembled in our temperature controlled spindle room to ensure high quality, reliability, and long spindle life.

Accurate and Stable Axes System

- The X/Z-axis are fitted with high precision linear guideways, fixed pre-tensioned direct drive ballscrews for fast, accurate machining in a thermally stable design.

TC- 26 / 36

Stable Boxway Design

- The large harden and ground boxways are made from high quality MEEHANITE® cast iron providing the utmost rigidity during heavy cutting operations.
- Turcite-B on X/Z-axis provides superior rigidity, low friction coefficient, reduced vibration, and superior damping characteristics without stick-slip, while still maintaining machining accuracy.
- Up to 15/20 m/min **591/787 ipm** of rapid feedrate of X/Z-axis.

Robust Geared Head Spindle

- The geared head spindle design incorporates angular contact ball bearings, double-row roller bearings, and powerful geared head transmission providing high rigidity and stability during machining.

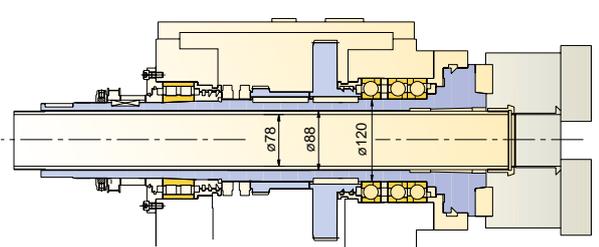

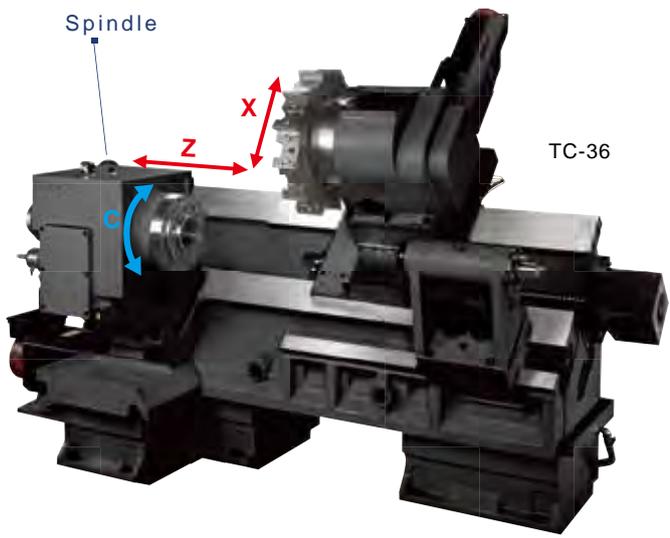

Programmable Tailstock

- "M" code commands, the quill stroke of the programmable tailstock. The tailstock body can be "hooked" to the carriage and be positioned along the Z-axis.
- Tailstock with live quill is standard.

Independent Coolant Tank

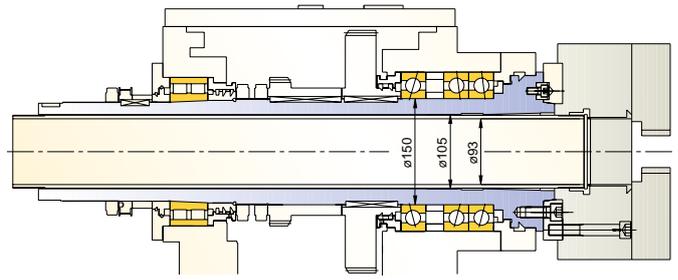

The ergonomic and easy to maintain coolant tank is separated from the machine, minimizing the influence of coolant temperatures providing a more thermally stable machine.

TC-26

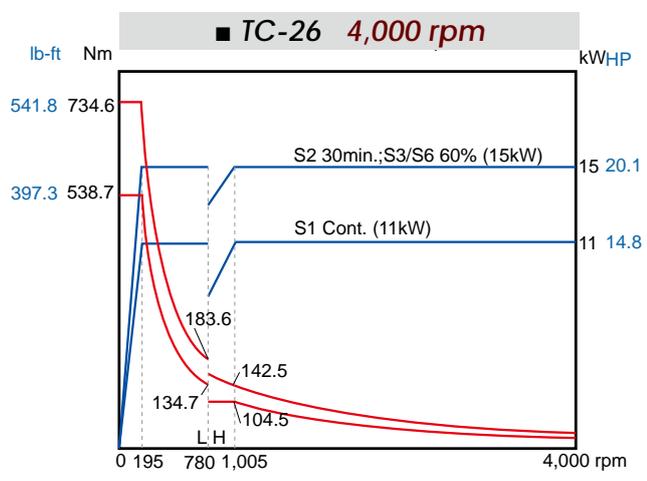

Bearing inner diameter: $\varnothing 120$ mm $\varnothing 4.72$ "
 Max. hole through spindle diameter: $\varnothing 88$ mm $\varnothing 3.46$ "
 Max. hole through draw tube diameter: $\varnothing 78$ mm $\varnothing 3.07$ "

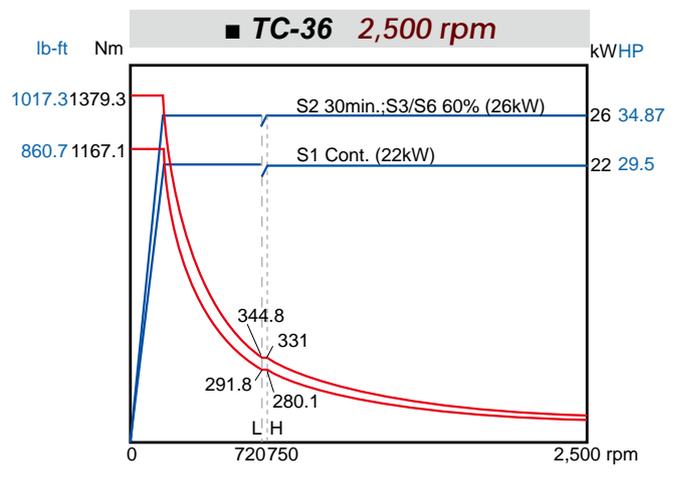

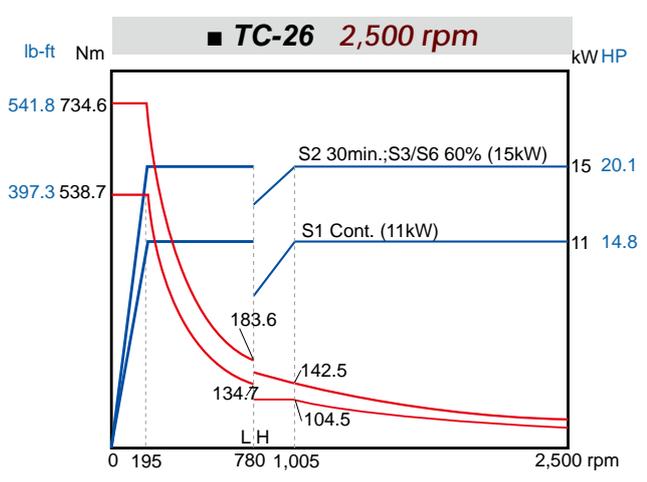

TC-36

Bearing inner diameter: $\varnothing 150$ mm $\varnothing 5.91$ "
 Max. hole through spindle diameter: $\varnothing 105$ mm $\varnothing 4.13$ "
 Max. hole through draw tube diameter: $\varnothing 93$ mm $\varnothing 3.66$ "

Power Torque

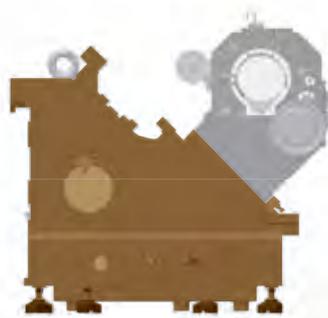

- The multi-speed geared head transmission features 74.5 kgf-m **539 lb-ft** of max torque with spindle speeds up to 4,000 rpm. (TC-26)
- This powerful multi-speed geared head transmission produces a massive max torque of 140 kgf-m **1,013 lb-ft**, with spindle speeds up to 2,500 rpm. (TC-36)

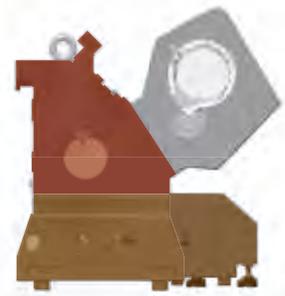

TC- 46 / 46M

Rigid Structure Design

- Unlike some competitive turning centers with multiple-pieces base structures, YCM features one-piece base structure made from high quality, durable MEEHANITE® cast iron.
- Designed with a wide span between the two Z-axis boxways provides exceptional rigidity and stability during machining.

YCM (One-piece design)

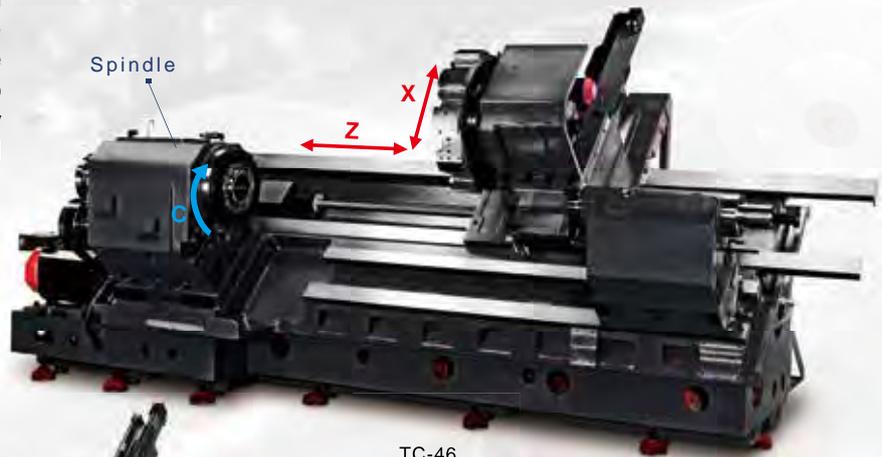

Others (Separate design)

Powerful Geared Head Spindle

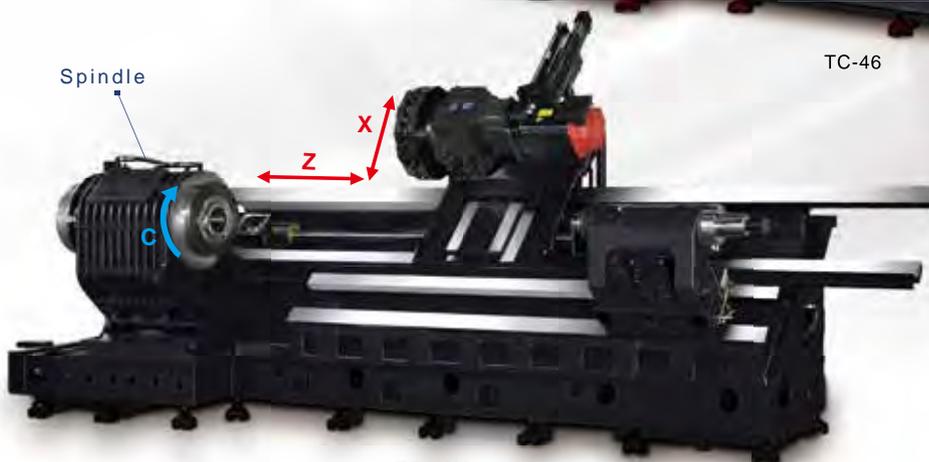

- Massive maximum torque with spindle speeds up to 2,000 rpm.
- Standard with A2-11 spindle nose and 15" chuck.
- Optional 18"/21"/24" chucks with A2-15 spindle nose, big bore, and 1,200 rpm are also available.
- Large-diameter, heavy duty bearings provide high rigidity in heavy duty machining operations.

Extra-large Front Bearings

- Large front bearings with $\varnothing 180$ mm $\varnothing 7.09$ " ID enables large through hole capacity and ensures heavy duty cutting capability.
- Max. spindle through hole diameter: $\varnothing 130$ mm $\varnothing 5.12$ "
- Max. hole through draw tube diameter: $\varnothing 117$ mm $\varnothing 4.61$ "
- All TC spindles are precision ground, cartridge type and are assembled in our temperature controlled spindle room to ensure consistent assembly quality, high reliability, and long spindle life.

TC-46

TC-46M

Big Hole through Spindle (opt.)

- A2-15 spindle with $\phi 182$ mm $\phi 7.17$ " bore, hole through draw tube $\phi 165$ mm $\phi 6.5$ " with a wide range of chuck size from 18" to 24".
- Suitable for long workpiece that require deep boring and drilling operations.

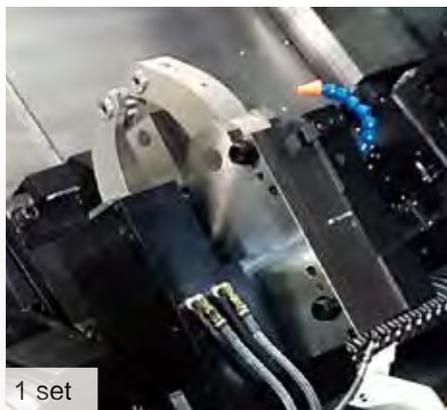

Fully Programmable Tailstock

- The tailstock is fully M-Code programmable.
- Provides rigid, firm support for extra-long workpieces to maximize machining precision.
- The MT-5 fixed quill with live center is included as standard. Live quill with dead center is optional.
- Two types of steady rests, manual-fixed and hydraulic-fixed. (opt.)

Manual steady rest (opt.)
 $\phi 40$ mm~ $\phi 250$ mm
 $\phi 1.57$ "~ $\phi 9.8$ "
 $\phi 250$ mm~ $\phi 460$ mm
 $\phi 9.8$ "~ $\phi 18.1$ "

TC-46M /3200
 Hydraulic steady rest (opt.)

TC-46M /3200
 Hydraulic steady rests (opt.)

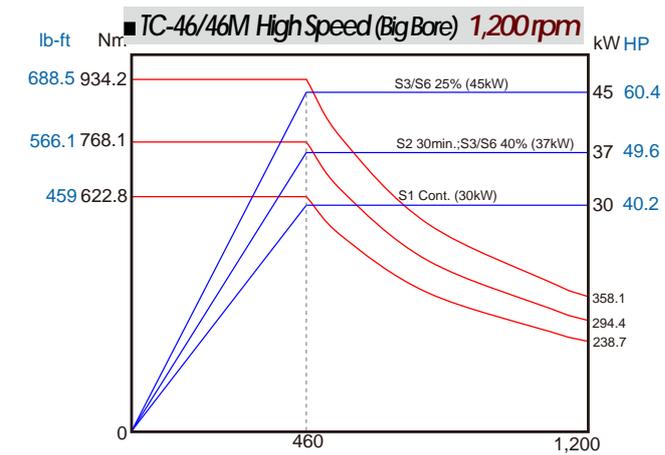

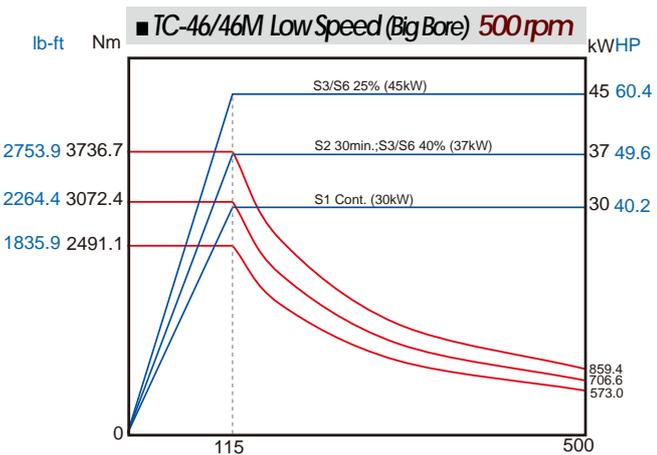

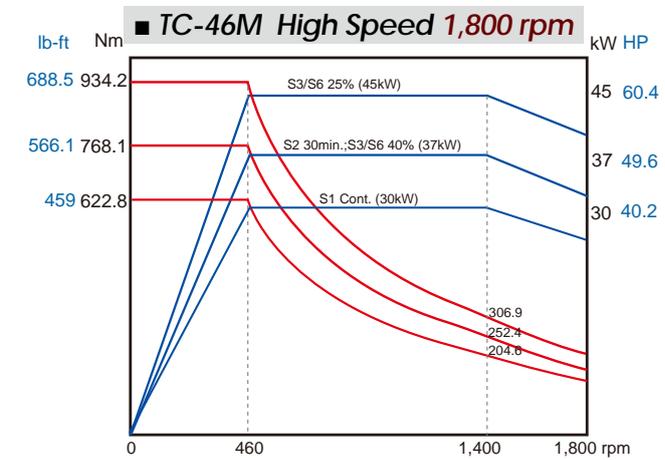

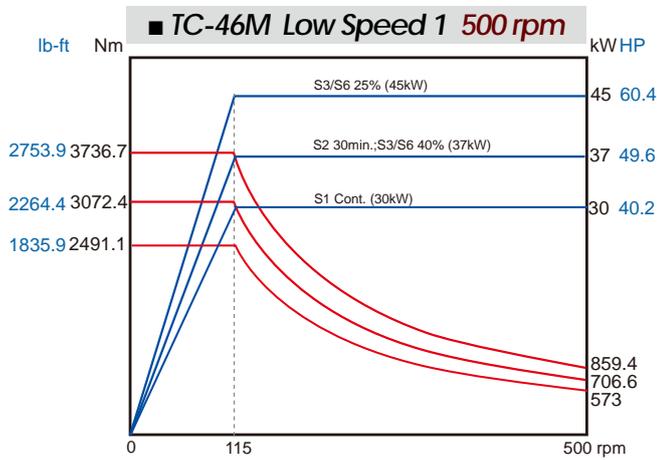

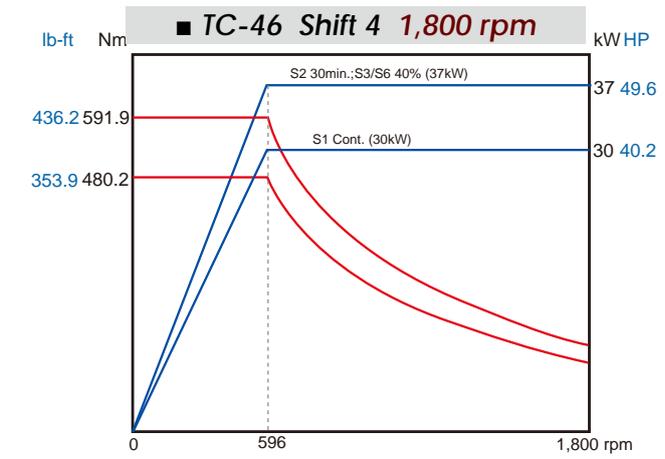

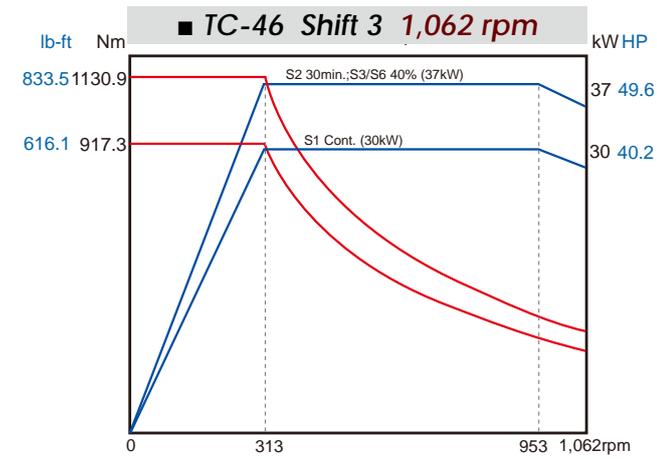

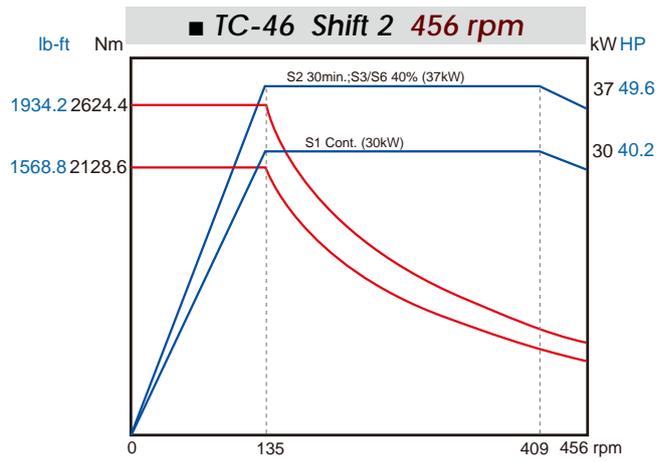

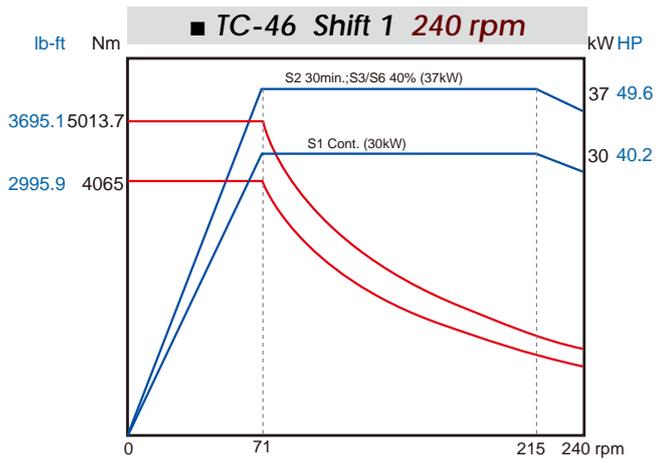

Efficient Chip Disposal System

- The 45 degree slant bed base design provides efficient chip removal and a spacious working area.
- Chip wash-down is supplied for optimal chip removal.
- Shower coolant, mounted from the roof helps to prevent chips from accumulating in the work area. (opt.)

Spindle Power – Torque Diagram

Power Torque

Powerful Machining Capability (TC-46)

Powerful Machining Capability

The powerful 4 speed geared head and robust high torque spindle enhances productivity by allowing extreme heavy-duty cutting operations.

Thermally Stable Spindle

The powerful spindle includes an oil-cooling system that greatly minimizing the heat generated by the geared head spindle during machining operations.

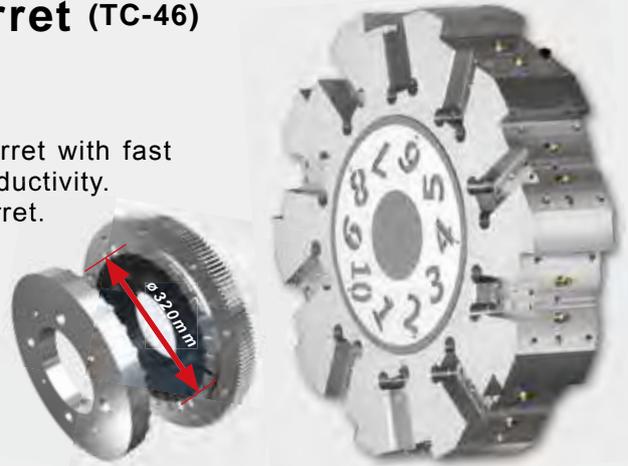

Fast and Reliable Servo Turret (TC-46)

Equipped with Large Servo Turret

- Robust 10-station, block type, servo driven turret with fast 0.9 sec. rotation time boosts efficiency and productivity.
- Optional 12-station, block type, servo driven turret.
- Optional BMT 85 12-station live tooling turret is available for heavy milling operations.

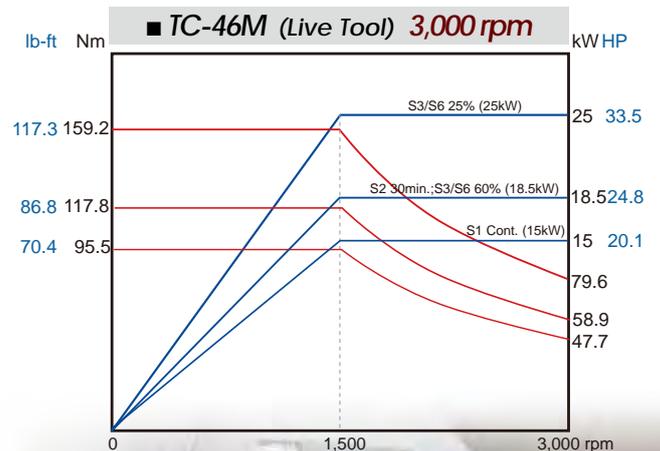

Large Diameter Curvic Coupling

The large diameter 3-piece curvic coupling is designed to provide superior turret clamp force during heavy cutting operations and ensure long-term accuracy.

Ultimate Machining Solution (TC-46M)

- 2 speed geared head spindle with max. torque of 380 kgf-m **2,748.59 lb-ft** is driven by a powerful 30/37 kW **40/50 HP** spindle motor.
- The high torque spindle incorporates an oil-cooling system to ensure thermal stability
- C-axis spindle encoder provides accurate 0.001 degree positioning.

Fast, Reliable Servo Driven Turret (TC-46M)

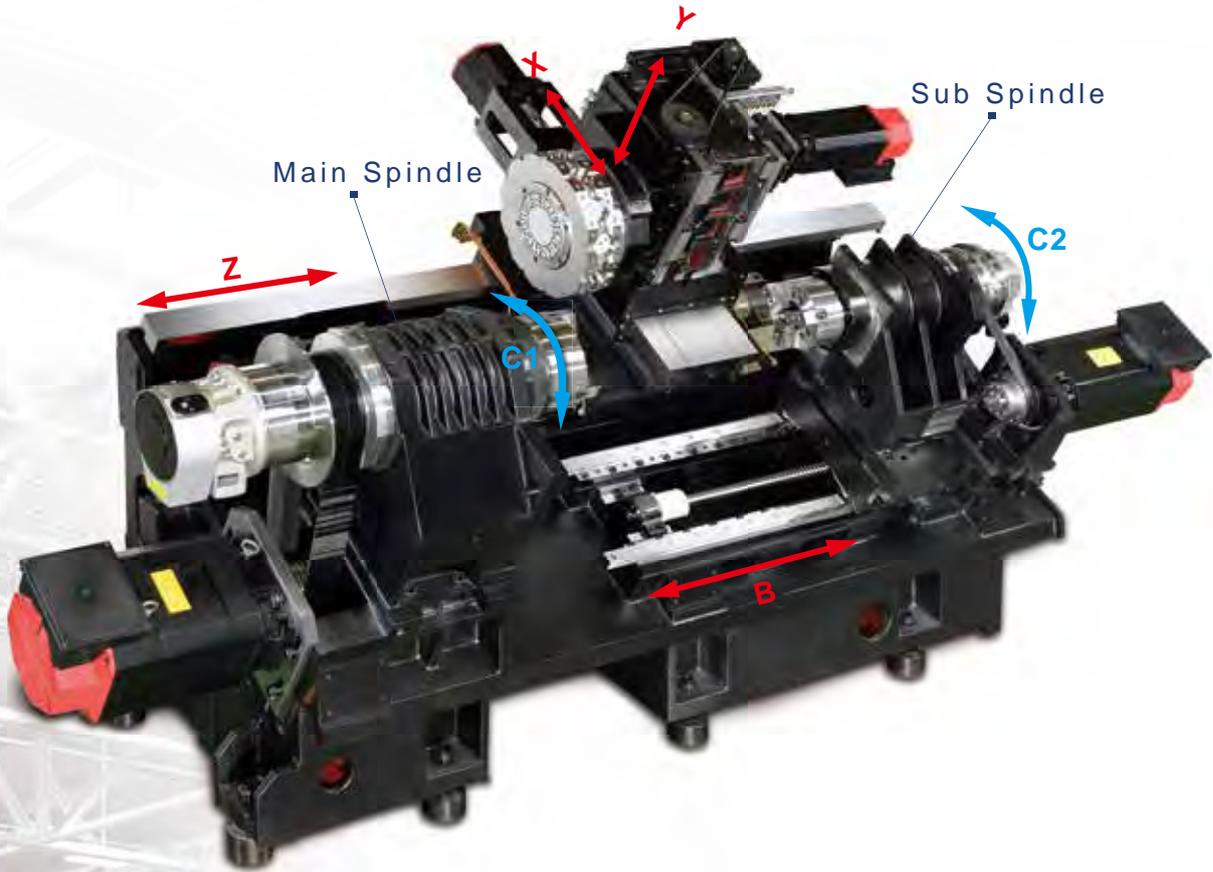

- 12 station BMT 85 live tool turret is driven by a powerful servo motor. Live tooling power is an impressive 15/18.5/22 kW **20/25/30 HP** with a maximum rotary tool speed of 3,000 rpm.
- Robust 3-piece curvic coupling provides superior clamp force, enabling excellent performance on heavy-duty milling and turning operations.

NTC

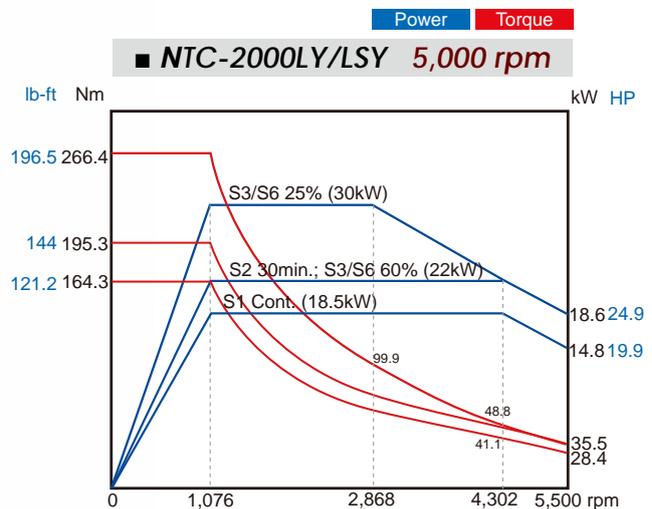

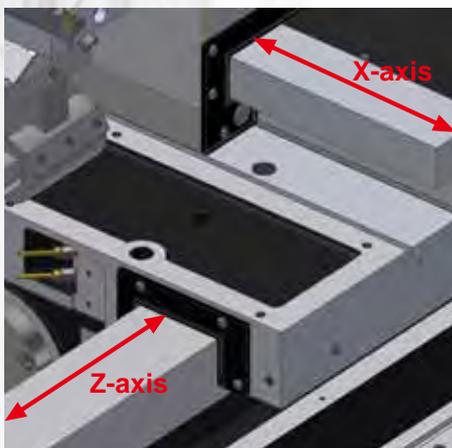

High Efficiency,
8" Modular Turn-Mill Center

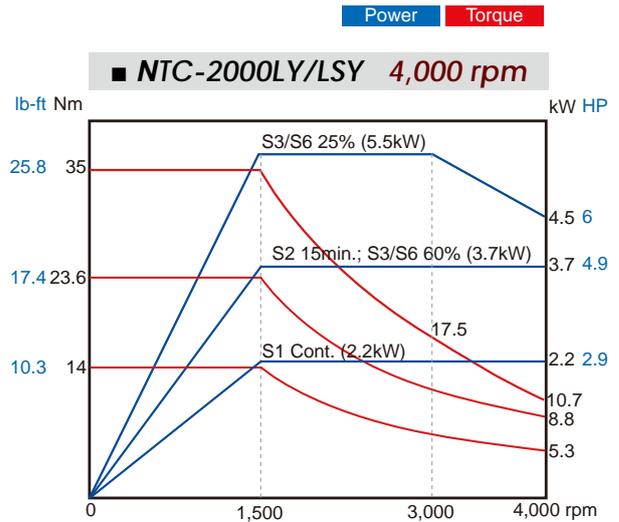

Robust One-Piece Base Structure

- One-piece 30° slant bed design made from high quality MEEHANITE® cast-iron.
- Turcite-B on X/Z-axis provides superior rigidity, low friction coefficient, reduced vibration, and superior damping characteristics without stick-slip, while still maintaining machining accuracy.

Integrated Sub Spindle and Y-axis for Complete Part Machining

- The orthogonal Y-axis design allows complex off center milling, drilling, and tapping in a single setup eliminating the need for a secondary milling operations.
- The combination of sub spindle and Y-axis allows the complete machining of prismatic parts in a single setup improving efficiency and accuracy due to less part handling and completing the part in one setup, compared to using multiple machines.

Flexible Manufacturing Solution

- Optional sub spindle with 6" chuck, or 2 different types of optional tailstocks are available depending on the customers production requirements. Choose either a fully programmable hydraulic tailstock, or servo-driven tailstock.
- Manually positioned tailstock with programmable quill is the standard configuration.

NT

High Efficiency,
10" Turn-Mill Center

Reinforced Base Structure

- One-piece 30° slant bed design made from high quality MEEHANITE® cast-iron.
- The rigid structure is designed with high dampening characteristics to reduce the effects of vibration and minimize thermal deformation.
- The robust box ways are heat treated through an induction hardening process and precision ground to achieve optimal rigidity, accuracy and long service life.
- Designed with a wide span between the two Z-axis boxways provides exceptional rigidity and stability during machining.

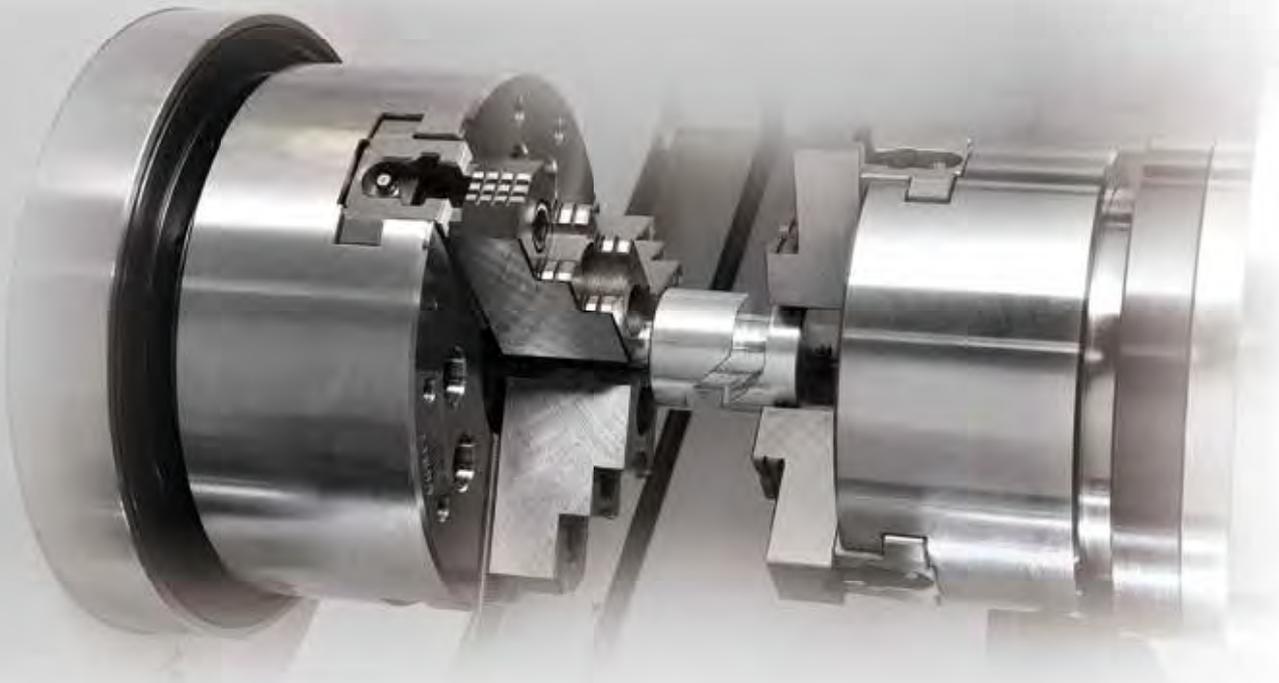

High Speed Servo Turret

- Turret index and rotation is controlled by servo motor, enabling reliable and fast tool index times.

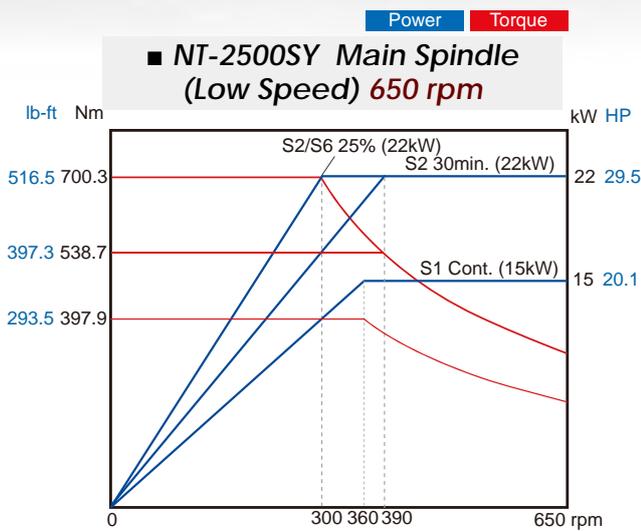

Single-setup Efficiency

- Packed with sub spindle, Y-axis and live tool turret, these turn-mill features allow complex finished parts machining in just one setup, while also improving efficiency and accuracy.
- X/Y/Z/B-axis are equipped with direct drive motors to enable high-accuracy positioning and repeatability.

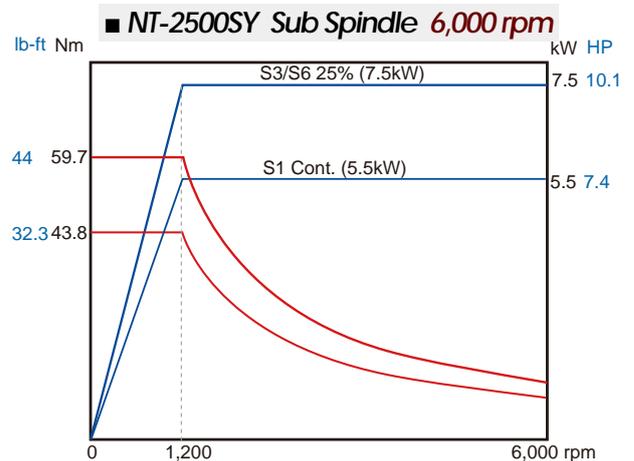

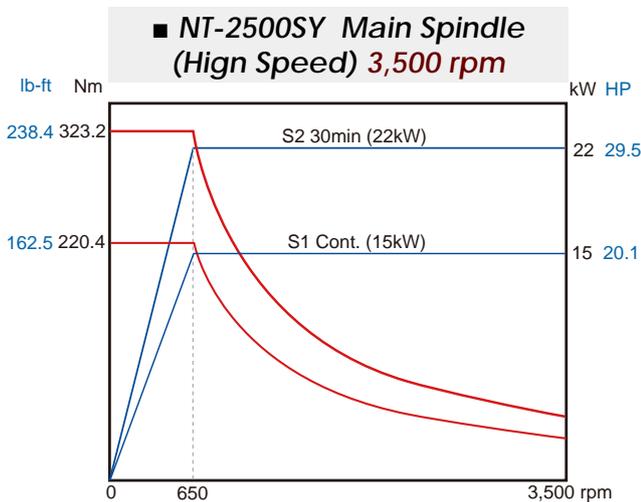

YCM Manufactured Built-in-type Motorized Spindle

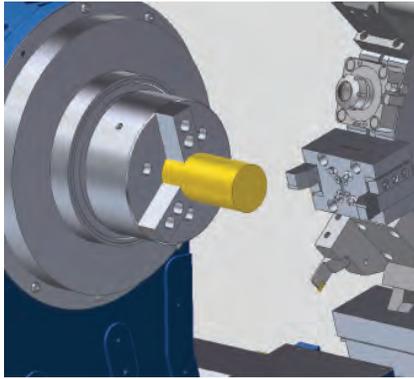

Spindle Power – Torque Diagram

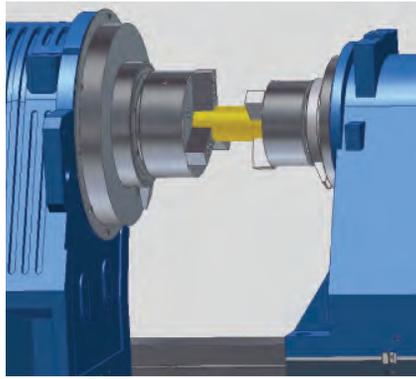

- Built-in spindles are more accurate and responsive compared to analog spindle drives, motors and belts. The motor is more reliable and requires minimal maintenance, since it is liquid cooled, brushless, permanently sealed and lubricated.
- The spindle chiller circulates oil around the spindle and controls the temperature minimizing thermal deformation.
- The spindle utilizes large diameter bearings that improves rigidity and cutting capability.
- C-axis index: 0.001°.

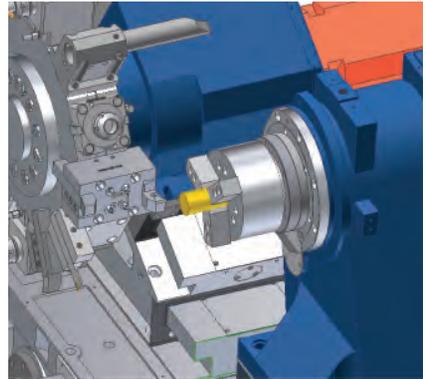

Continuous Machining Capability

Main Spindle

Transfer, or cut-off and transfer from main to sub spindle

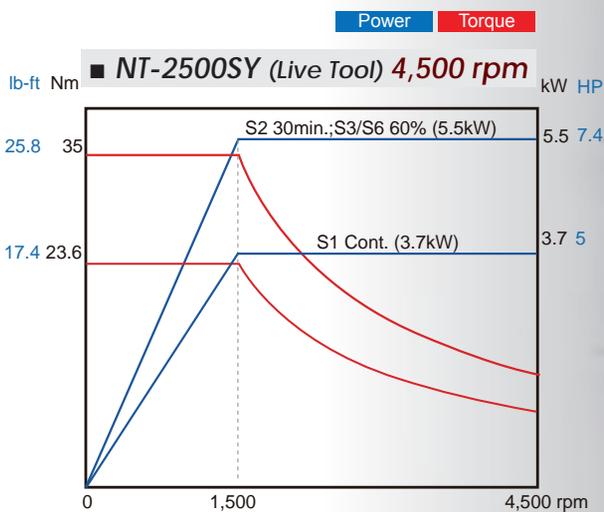

Sub Spindle

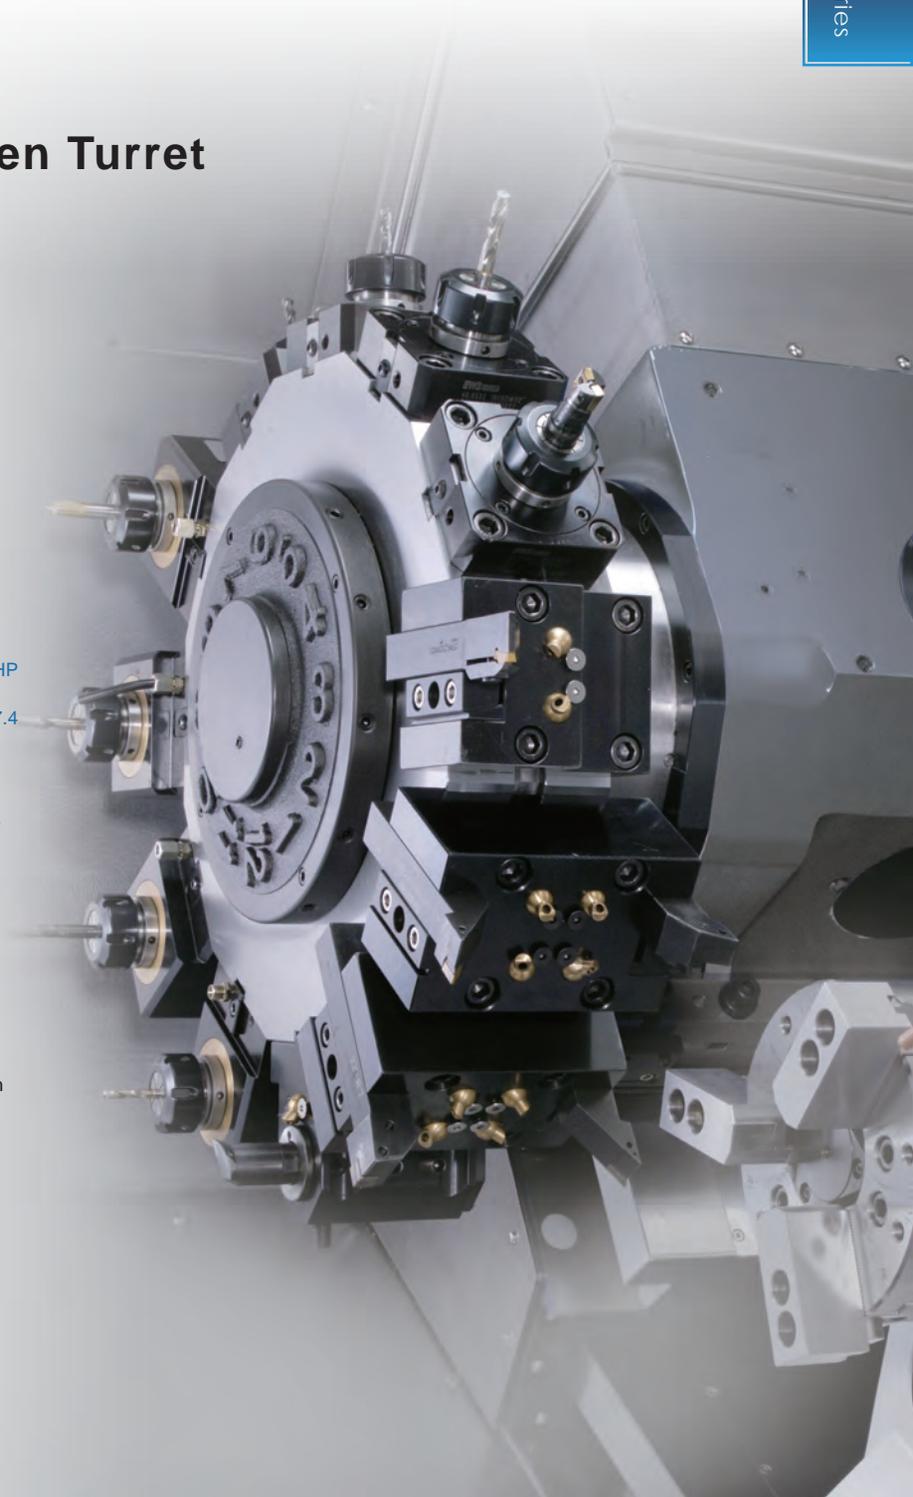

NT series

High Speed Servo Driven Turret

- BMT65 live tooling turret with 12 stations minimizes interference as the part is turned and milled.
- The servo driven turret is designed with large diameter curvic coupling and hydraulic clamping system that provides high clamping force, along with precise turret positioning and repeatability accuracy.

- Max. live tool power: 5.5 kW 7.38 HP
- Index time: 0.18 sec.
